#### SECTION 7 – HANDLING AND STORAGE

Handle in accordance with good industrial hygiene and safety practices. These practices include avoiding unnecessary exposure and prompt removal of material from eyes, skin and clothing. Good housekeeping is essential in reducing possible slipping hazards.

**HANDLING AND STORAGE:** Store away from strong acids and bases, oxidizers and chemicals reactive with hydroxyl compounds. Provide sufficient general ventilation during and after application. Avoid prolonged or repeated contact with skin, eyes and clothing. After handling this product, wash hands before eating, drinking or smoking. If necessary, take first aid action shown in Section 4.

#### SECTION 8 – EXPOSURE CONTROL/PERSONAL PROTECTION

##### GENERAL CONSIDERATIONS:

Consider the potential hazards of this material (see section 3), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting protective equipment.

**EYE PROTECTION:** Safety glasses with side shields are recommended as minimum protection. Chemical goggles or faceshield combined with safety glasses should be worn during transfer operations or when there is a likelihood of misting, splashing or spraying of this material.

**RESPIRATORY PROTECTION:** Not normally needed. Use NIOSH-approved respirator for organic vapors if exposure is unknown or exceeds any permissible limits.

**PROTECTIVE GLOVES:** Wear protective gloves (suggested are neoprene, nitrile rubber) if irritating to skin.

**VENTILATION:** General or Local exhaust.

**LOCAL EXHAUST:** Recommended in circumstances where general ventilation is limited, personal exposure is above recommended limits, or where respiratory irritation occurs.

**Use NIOSH/MSHA approved respiratory protection equipment when airborne exposure limits are exceeded (see below). Consult the respirator manufacturer to determine appropriate type of equipment for a given application. Observe respirator use limitations specified by NIOSH/MSHA or the manufacturer. Respiratory protection programs must comply with 29 CFR 1910.134.**

**VENTILATION NOTES:** Provide general or local ventilation to control exposure levels below airborne exposure limits (see below). The use of local mechanical exhaust ventilation is preferred at sources of air contamination such as open process equipment. Consult NFPA Standard 91 for design of exhaust systems.

**ACGIH THRESHOLD LIMIT VALUE:** None established for this Product.

**AIHA WORKPLACE ENVIRONMENTAL EXPOSURE LEVEL (WEEL):** 8-hr Time-weighted Average (TWA) 10 mg/m<sup>3</sup>.
